Figure 1: Schematic representation of the study design. The diagram shows a timeline for three groups: Control (n=100), Low-dose (n=100), and High-dose (n=100). All groups start at 0 weeks. The Control group remains at 0 weeks. The Low-dose group starts at 1 week. The High-dose group starts at 2 weeks. All groups are followed up at 4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48, 52, and 56 weeks. The High-dose group shows a significant increase in the number of lesions at 52 weeks compared to the other groups.
